

WORKSHOP

From the Sea, Antarctica and Space, toward the future of Telemedicine and eHealth

“It’s one of the most difficult choices a person has to make: Deciding whether to put a parent or grandparent into an assisted living facility.

But when their quality of life is compromised, what other choice is there?

Well, thanks to modern technology, here’s one: “Telemedicine.”

Let me explain how this new system works, the benefits, and of course, the best way to play this rapidly growing multi-billion dollar industry.” Wall St Daily, Mar 23rd, 2011

“New models go much beyond the scope of venerable traditions like organizing health and welfare in independent silos and seamlessly integrate the healthcare and social service domains. Both eHealth and Telemedicine provide personal health services and can contribute significantly to the successful implementation of up-to-date health strategies.” European Health Telematics Association (EHTEL) Symposium, 2011 Nov 30th, 2011

Convenor: SCAR/COMNAP Joint Expert Group Human Biology and Medicine

Date: April 12-14th 2012

Topics:

- 1) Antarctic Telemedicine (experience, ongoing, future)
- 2) Space Telemedicine (experience, ongoing, future)
- 3) Maritime Telemedicine (experience, ongoing, future)
- 4) Lessons learned to be applied to everyday life

Venue: CIRM, Centro Internazionale Radio Medico, via dell’Architettura 41, 00144 ROME, Italy <http://g.co/maps/sh62t>

The Program Committee has listed a series of suggested topics for the overall agenda of the conference. Please review these topics and submit your talk under the various topic(s). Of course, if you have an idea for a topic not listed, please send your information as the Program Committee is always open to innovation and new ideas.

For information or to submit your request to be a speaker please send an email to pillon@gmail.com
